Certification Statement for Taxpayer Use – Section 25D, Credit for Residential Energy Efficient Property

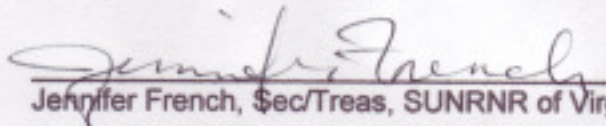

SUNRNR of Virginia, Inc, a Virginia corporation and manufacturer of SUNRNRs, certifies its current line of portable renewable energy generators and power systems meets the requirements of "qualified solar electric property" and "qualified small wind energy property" as defined in Notice 2009-41, Section 3, Residential Energy Efficient Property when used within the limitations underlined below.

SUNRNR's current line of qualified property includes the following models: SUN110, SUN220, and SUNPWR. The amount of the qualified expenditure, and therefore the tax credit provided under Section 25D of the Internal Revenue Code, will vary depending on the model and accessories (i.e. extra solar panel) purchased.

Please note: SUNRNR units are portable, may be used to generate electricity in a variety of applications, settings, and locations, and may generate the stored electricity by means other than solar energy or small wind turbine. However, SUNRNR of Virginia limits this Certification Statement as follows: A SUNRNR generator/power system is "qualified property" only when using renewable energy (solar/wind) to regenerate the stored electricity and that electricity must be used in or in connection with a qualifying dwelling unit. A qualifying dwelling unit is a "dwelling unit that is located in the United States and is used as a residence by the taxpayer" (Section 3.01(2)(a)).

Please refer to <http://www.irs.gov/pub/irs-drop/n-09-41.pdf> and <http://www.irs.gov/pub/irs-pdf/f5695.pdf> for more information.

Under penalties of perjury, I declare that I have examined this certification statement, and to the best of my knowledge and belief, the facts presented are true, correct, and complete.

Jennifer French, Sec/Treas, SUNRNR of Virginia, Inc.
